

**STEEL STRUCTURE
WAREHOUSE**

GOLDRAIN STEEL STRUCTURE WAREHOUSE

Where the house can be used ?

Construct composition

1. Wall and roof materials : EPS/Rockwool/PU/PIR Sandwich Panel
2. Color: normally, white gray, blue and red;
3. Mouldle: Single slope or double slop;
4. Window material: Plastic steel or aluminum, swing or sliding
5. Door: EPS Sandwich panel, PU sandwich Panel, Plastic steel or Aluminum.

Advantages

1. It can save time and can be installed in any weather
2. Attractive design: the whole warehouse looks beautiful and elegant. The inner, outer walls and the roof boarding all use the color steel sandwich panel, the filling material could be thermal core.
3. Fire-proof, Waterproof, heat/cold-insulation, non-shrinking and enlarge the work size and have little pollution. Also Anti earthquake.
4. Easy to assemble and dismantle: the warehouse can be rebuilt for dozens of times. The assembling only requires simple tools: plugs and screw.
5. Firm structure: the warehouse adopts steel frame structure and sandwich panels.
6. Light weight and convenient in shipping
7. Customized. The roof, wall, door, windows can be chosen by the customer.
8. Durable: the steel frame parts are all processed with anti-corrosion coating and can be used for as long as 50 years from the design.
