Infusion Used: Innovative product with patent

Injection Kit Mixer: Liquid and powder medicine mixer for infusion used

The syringe set (Injection Kit Mixer) consists of mixing needle and sealing cover. This syringe set medical adopts non-toxic and harmless materials. The mixing needle is made of ABS material, the sealing cover of syringe set (short and long) is made of medical polyethylene.

The function of syringe set mainly contains sealing function, tunnel permeability, tensile strength, puncture performance, degree of coordination, particulate contamination, reducing substances, metal ions, ph, ethylene oxide residue, sterility, bacterial endotoxin, cytotoxicity, sensitization, intradermal reaction, hemolysis, acute systemic toxicity, etc.
